

Assembly President Report

Bobby Schmitz

2/21/2014

Assembly Members:

It has been a busy month, finding the lay of the land and discovering just what needs to be done for the assembly.

Programming Fee

Thank you all for your help emailing your constituents for feedback about the program fees. Not everyone responded to the email, so we will deal with that as necessary. Next week, we will have a GoogleDoc so that everyone can input their method of communication and department structure.

GSO Funding

We have been discussing the possibility of assembly members becoming more involved with the GSO funding process. As many of you know, every organization that applies for funding must have a member be their sponsor. It would be great if that sponsor could take a more active role in the Org's event, starting email communication with them and possibly attending the event.

New Members

There have been many members who have been completely inactive this year, and we plan to remove them soon. There has been a wave of interest in becoming a member of the assembly, and we can replace many of the positions.

Committee Meetings

I would like to meet with the heads of all committees, so that we can get more work done as an assembly.
