LaTeX: Professional Typesetting!
Technical Documents and Graphic Art

The ideal DIY solution for aspiring novelists, academics or flyer & brochure makers

What is LaTeX? A document preparation system for producing high-quality documents ready for publishing, whether it’s an annual report, a dissertation, a novel, an article for a journal, a book for a publisher, a newsletter for your club or society, or a leaflet or brochure for a product, event, or venue.

What do I need? Access to the internet, a web browser and your content of course!

Is this different from Word? More powerful than a wordprocessor, LaTeX was meant for publishing. Do you have problems with cross referencing, changing styles, complex table of contents, appendices, bibliographies? Takes minutes to create and edit with LaTeX.
